Design Concept

Green 6's architectural design and landscaping are tailored towards your comfort and with your peace of mind at heart.

Green 6 is designed with modern geometric forms, elevating façades and improving space utilization to make Green 6 a more modern and complete residential compound.

Lush greenery and paved roads are spreading all over the area to make sure you have the serenity that you deserve.

At Green 6 we exemplify of our commitment to the continuous improvement of our product. By listening to our customers' needs and requirements, and implementing the latest in technical design concepts.

In Green 6 there are no back to back buildings, elevating the level of privacy and security throughout the compound, ensuring that your peace of mind and serenity will not be disturbed.

Utilizing contemporary design techniques, we have eliminated the concept of skylights in our buildings, better utilizing the space and imbuing each and every building with more: unrestricted natural lighting and improved airflow and circulation.

Thus resulting in an overall more harmonious and relaxed atmosphere that better utilizes the open spaces and landscape available, resulting in uninhibited, unparalleled views from each unit.
